2016 Postsecondary Pathways: Partnering for Career Success

Postsecondary Pathways is a regionally based discussion among K-12 counselors and educators, corporations, employers, youth-serving professionals, and state and regional government agencies about how best to connect Hoosier students with the education and careers that fit their skills and interests.

Through panel discussions, keynote presentations and group networking, attendees will be connected to resources that enhance their ability to educate and train students to successfully complete the postsecondary pathways that exist within their region and the state.
